25 great jobs for people who love to travel

Branding is defined as the process of coming up or making a unique name or design for a certain product. Having a good brand strategy allows you to have a major advantage in gaining a large increase in your market competition. Your brand tells your customers what they can have or expect from the products and services you offer.

Are you innovative or are you the experienced type? Or do you offer a high-cost, high-quality product, or a low-cost, high-value product? It's impossible to be both. You should consider on thinking what your customers need you to be. Your logo is the main part based on the questions how, what, when, where, why, and how much.
