OARS
Office Of Accessibility Resources & Services
OARS Mission

• Facilitate access to a college education and all aspects of university life

• Promote awareness and inclusion through Universal Design

We do this because you matter!
Students connect with OARS for a variety of conditions.

About 31% of students who connect with us have General Anxiety Disorder and/or Major Depressive Disorder. 23% have ADHD, and around 12% have a learning disability such as Dyslexia.

Note: We also work with students with temporary conditions.
What are Accommodations?

Different for each individual and may include:

- Note-Taking Technology
- Extended time on a timed exam
- ASL Interpreters
- Use of personal magnification device in class
I think I may have a disability… What can I do?
Have a physical, emotional, and/or a medical situation?

Sustained an injury or had a concussion and need temporary accommodations?

Studying for hours and hours, know your course content, but still struggling with exams or grades and believe you may have an undiagnosed condition?
