ANY STUDENTS STILL HERE?

How can advisors help my student?

1 Listen.

2 Explain the rules.

There are a lot of them. We get paid to know them and to help students understand their impact.

3 Help build a plan.

There are lots of possible pathways, so advisors help students find the pathway that is best for them.

Fall Classes

Aim for 15 or 16 credit hours. That will probably be 5 classes.

The classes should meet requirements for their major &/or Minerva's Academic Curriculum

The classes should be spread across the week so that students can get all the work done

The classes should be the right kind of hard.

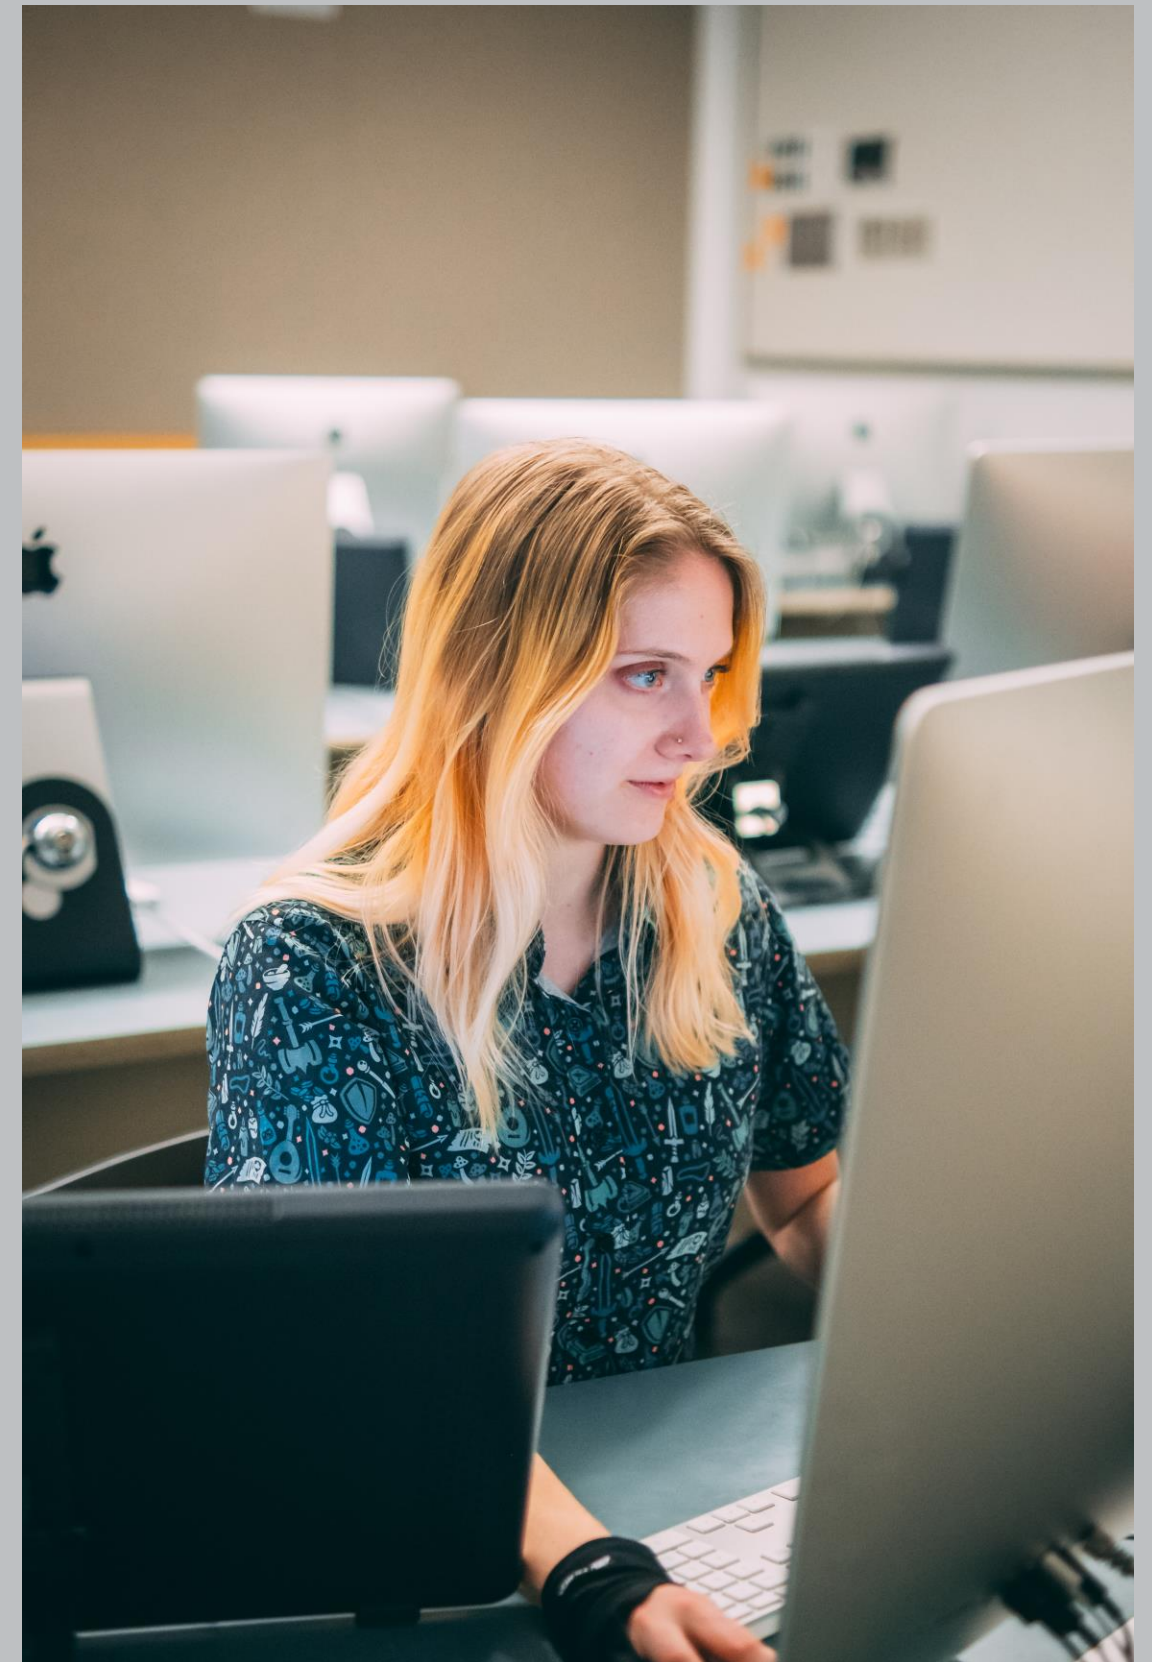

Fall Classes

We started their schedule by registering them for:

- 1) A class for their major
- 2) Two Minerva's Academic Curriculum Classes

During the open lab time tomorrow, they can use Schedule Hero to add two more classes, while advisors are there to help answer questions.

They can also reach out to us after SOAR if they still have questions or need more help adding a class.

Talk to me.

I'll listen.

Then we plan!

How did the plan work out?

What needs to change?

How can that happen?

**What questions
do you have for
me?**

THANK YOU
